Hello, I'm Imran Matano.

Professional summary

I'm a full stack web developer with about 3 years of experience. I have interacted with different frontend and server side web projects. My experience has led me to work with many people and take part in hackathons. I have developed softwares under different software designs and approaches to maximize efficiency and reduce production cost under the stated timeline.
I have open source all projects, find them on github at https://github.com/imrany .
